

3.6 Implementing Firewall (Sophos XG 550 Rev.2)

Sophos XG Firewall provides advanced threat protection across all areas of network security. The solution simplifies the core network security tasks in firewall management, information reporting and system configuration. Sophos XG Firewall helps organizations to secure their network, wireless, web operations as well as email and web server.

In this project we used Sophos XG 550 Rev. 2 firewall to secure the company network.

Sophos XG 550 Initial Setup Process.
